Signage

Tactile door plates

Our door plate quality line is the classic that is available with raised profile-lettering and Braille. Due to its precise contours, the tactile writing can easily be felt by blind and visually impaired persons.

Our modular signage systems including door plates and wall signs meet the highest demands. They combine high-grade materials, a timeless design and a high resistance against vandalism. They also offer the choice of permanent lettering or a paperflex version.

Barrier-free signs

Customized designs

Our signs are every bit as varied and creative as our costumers are. Customized products of all shapes, colours, languages and designs are our daily business.

We will be happy to put your ideas into practice and give advice on all the necessary requirements.
